

### DC-UPS

#### NBPAQ33G1M13

#### 1 Short description

The battery-buffered DC power supply of the AKKUTEK series operates according to the standby parallel principle and, in conjunction with a lead accumulator, ensures that the DC voltage supply is safely maintained in the event of a power failure. The buffer time depends on the charge state of the accumulator and the discharge current

The power supply has the following characteristics:

- Battery charger with I/U-charging characteristics
- Micro controller-supported battery management
- Temperature tracking of the charge voltage by external sensor module (option)
